

CDS 6020

CONCENTRATOR 20-PORT

THE MTU/MDU DSL SERVICE PLATFORM CONCENTRATOR

CDS 6020 is an expandable and scalable DSL service Platform 20-port Concentrator module, which provides a unique infrastructure for delivering a broad array of network access services with high-capacity traffic aggregation capabilities and robust always-on performance expected of a true carrier-class product.

The easily stackable modular design of the CDS 6020 Concentrator makes it ideal for MTU/MDU deployment where space is at a premium. With the addition of the CDS 6910 Fast Ethernet Switch, you can add CDS 6020 Concentrator modules to your MTU/MDU CDS 6000 Platform to support a maximum number of DSL subscribers.

Features & Benefits

- Stackable module for easy expansion
- 20 high speed ADSL ports with up to 8Mbps over a single copper pair.
- Multi-mode auto-handshake for different ADSL flavors assures interoperability
- Support Multi-Mode: G.Lite, G.DMT and T1.413
- Cooling system with highly reliable cooling FANS

Network Management Functions

- Windows®-based Management software: Supports Windows® 2000/NT/ME 98/95
- Subscriber management functions capable of assigning bandwidth for each subscriber account.
- Centralized management capability enables remote management and monitoring of subscribers status with different locations.

Physical Unit

- Standard modular design for 19" rack mount-installation
